

CAMPUS SAFETY MANAGEMENT: WORKSHOPS FOR FACULTY & STAFF

Program Description

Background:

- Faculty, managers and staff who have responsibilities for creating and maintaining a safe work culture need the skills, tools, and resources on how to establish and sustain safe work practices.
- Managing campus safety effectively requires an all-hazard evaluation and interdepartmental approach to assure that the practices and policies reduce the risk and sustain personnel and public safety.
- A series of workshops to promote and sustain campus safety and safe work practices include a wide range of topics including: Hazardous Materials Handling, Violence Prevention & De-escalation, Physical Hazards & Lifting, First-Aid & CPR, Threat Awareness, Emergency Preparedness; Equipment Safety, Vehicle Safety; Work Zone Safety & Traffic Control, Special Event Safety, Outdoor Safety, etc.

Objectives:

- Participants will be able to list methods for preventing violence, describe warning signs for personal safety, and identify techniques for deterring and de-escalating violence

Instructors:

- Instructors who have more than 10 years of experience in higher education safety and personnel safety training.
- Methodologies for instruction will include discussions, visual examples, demonstration, and exercises

Outcomes:

- Personnel will be able to identify practices and techniques to reduce their risk for a variety of campus hazards.

Class Essentials:

- Sessions range from 2 hour workshops to full day certification programs for select topics.

Session Design

These Workshops will review examples, causes, and trends of campus safety concerns as well as techniques and practices to prevent them. They include:

- **Hazardous Material Handling** - Identify the regulations and practices associated with proper handling of hazardous materials. Review key sources of information on hazardous materials, and toxicology.
- **Violence Prevention** - Introduce approaches for handling hostile situations, verbal de-escalation, and conflict management.
- **Physical Hazards & Lifting** - Help employees to understand the areas of strengths and weakness of the human body, so everyone can adapt their practices to use their strengths for challenges with physical activities.
- **First Aid, CPR, & AED** - Provide faculty, staff and students with certification in American Heart Association Heartsaver & BLS for Healthcare Professionals, CPR, First Aid and AED Certification & refreshers.
- **Emergency Preparedness** - Review of plans and Incident Command System, as well as, practice various emergency scenarios from weather- related incidents to threats.
